

Holistic Biofeedback

*(Electro Physiological Feedback Xrroid) Biofeedback
Balancing*

This can be done long distance – never leaving the comfort of your home!

Quantum Interfacing is a state-of-the-art scientific breakthrough designed for stress reduction at all levels. The EPFX/USB computer scans your physical, emotional, mental and spiritual intelligences, in order to assist you in understanding your symptoms and conditions at a level that you may not have been aware of before. Many think that wellness is freedom from symptoms. However, by the time you start having symptoms, your body is likely to be in a weakened condition. At a quantum level your body knows what it needs to achieve balance. Wellness has to do with the ability to know yourself and take actions accordingly. With this in mind the wellness test was designed to give you a method of observing your limitations. Prevention would be more accessible and achievable, if you knew this information in advance.

This computer program uses a non-invasive method, which takes approximately 3minutes to test your reactance to over 10,000 items and returns 65 million bits of data. The results of this data is displayed in an easily readable and usable list, which can be organized and studied in many different ways. Any undesirable organism or substance will be illuminated as an energy weakness. The EPFX/USB then assists the body in resolving congested energy through a unique two-way interface, thus allowing your energy systems to once again flow naturally. This results in restoring the harmonic resonance within your intelligences to be able to fight disease and dis-ease conditions, which are daily challenges to your health and vitality.

Some of the conditions that the EPFX/USB Biofeedback interfaces with are fungi, allergies, parasites, virus, molds, environmental stresses, emotional imbalances, hormone imbalances, bacteria, as well as a multiple of other conditions. The EPFX/USB energetically assists in supporting your DNA, blood, bone, tissues, muscles, organs, dental, and other systems through the *energetic transfers* of minerals, vitamins, enzymes, flower essences, amino acids, etc., which are created specifically to fit your needs.
