

THE MOTHER'S LAP

I started contacting and receiving messages from the Divine Feminine, aka The Divine Mother, after having an apparitional experience in 1992 in a church in Alötting, Bavaria, while on a spiritual retreat.

She comes under many different names throughout the world, and she is always there to assist in the evolution of the human heart and soul.

At this time I am working in conjunction with Her on sacred contracts with children and their parents, and sometimes their teachers. This helps to facilitate the understanding of how to assist in raising the children, as well as how to teach and move through some of the difficulties with them. She also explains to people why they go through some of their challenges, and what steps to take to lighten their stress. As long as a person is committed to their soul's growth, She is right there to help them in whatever way She feels is appropriate.

I have traveled to various parts of the world and delivered her messages to those whom have asked. I certainly am not the only one doing this in these times; however, as She moves through each of us, it is unique because we are all different. I feel deeply humble and blessed that I can assist Her and others in this way.

People have reported smelling a rose essence in the room, having feelings of unconditional love that have made them cry, an over-whelming sense of peace and well-being, and a knowing that they are not alone.
